

# The National Geospatial-Intelligence Agency's Mobile Awareness GEOINT Environment

# MAGE

MAGE allows you to create geotagged field reports and observations that contain media such as photos, videos and voice recordings and share them instantly with other members of your team.

## 1. Download the App

**Available on Google Play & Apple App Store**

Search MAGE GEOINT to download

<https://appsto.re/i6hH4rk>

<https://goo.gl/EUJVfX>

## 2. Enter your Server URL

<https://mageserverurl>

## 3. Create an Account

From the login screen, click the **Sign Up Here** link.

## 4. An Admin will approve your account

To ensure that only approved users have access, an admin will have to approve your account before you can login.

Display Name

Email

Password

Confirm Password

Cancel Sign Up

## 5. Register your device

After your account is approved, you must log in with your device to register with the server. An admin will then approve your device. This registration ensures that only approved devices can access your MAGE server and data. If a device is lost, that device can be removed without removing your user account.
